## IT Undergraduate

University of Moratuwa

## ABOUT ME

I am a committed and enthusiastic IT undergraduate with a passion for creativity and problem-solving. As a confident and self-motivated individual, I aim to contribute to dynamic environments while continuously expanding my expertise in software engineering. I am actively searching for a **software engineering internship** to gain practical experience and further develop my skills. I am driven by a desire to learn and grow, and I look forward to applying my skills to meaningful and impactful projects.

## PROJECTS

### Reservation Management System

(Level 2 Software Project)

The web-based reservation management system is designed for large organizations with multiple companies. Unlike typical customer-facing reservation systems, it is operated by staff who input reservations made by customers via telephone or in-person visits. This approach enhances the customer experience by simplifying their interaction with the reservation process and allows organizations to maintain better control. The system streamlines reservation management, improving efficiency and reducing complexity for large organizations.
